PDE049023357.1	LOC102724334	H2B histone family member S; Histone H2B type F-S; Core component of nucleosome. Nucleosomes wrap and compact DNA into chromatin, limiting DNA accessibility to the cellular machineries which require DNA as a template. Histones thereby play a central role in transcription regulation, DNA repair, DNA replication and chromosomal stability. DNA accessibility is regulated via a complex set of post-translational modifications of histones, also called histone code, and nucleosome remodeling	N	PDV049023357.1_00100
PDE049023358.1	LOC102724560	Cystathionine beta-synthase; Hydro-lyase catalyzing the first step of the transsulfuration pathway, where the hydroxyl group of L-serine is displaced by L-homocysteine in a beta-replacement reaction to form L-cystathionine, the precursor of L-cysteine. This catabolic route allows the elimination of L-methionine and the toxic metabolite L-homocysteine. Also involved in the production of hydrogen sulfide, a gasotransmitter with signaling and cytoprotective effects on neurons	N	PDV049023358.1_00100
PDE049023359.1	LOC102724594	U2 small nuclear RNA auxiliary factor 1; Plays a critical role in both constitutive and enhancer- dependent splicing by mediating protein-protein interactions and protein-RNA interactions required for accurate 3'-splice site selection. Recruits U2 snRNP to the branch point. Directly mediates interactions between U2AF2 and proteins bound to the enhancers and thus may function as a bridge between U2AF2 and the enhancer complex to recruit it to the adjacent intron; RNA binding motif containing	N	PDV049023359.1_00100
PDE049023360.1	LOC102724652	Crystallin, alpha A; Contributes to the transparency and refractive index of the lens. Has chaperone-like activity, preventing aggregation of various proteins under a wide range of stress conditions; Small heat shock proteins	N	PDV049023360.1_00100

ID	Term	Description	Type	Variable IDs
PDE050023800.1	IED Completed Stage Errors	The total number of errors made on stages that the subject successfully completed. This does not include the errors made on the stage (if any) on which the subject failed. Lower is better.	N	PDV050023800.1_00100

ID	Term	Description	Type	Variable IDs
PDE050023801.1	IED Completed Stage Trials	This is the number of trials undertaken on all successfully completed stages. Lower is	N	PDV050023801.1_00100
PDE050023802.1	IED Errors (Stage 1) - Simple Discrimination	This is the total number of errors made in Stage 1; when only one perceptual dimension is present. Lower is better.	N	PDV050023802.1_00100
PDE050023803.1	IED errors (Stage 2) - Simple Reversal	This is the total number of errors made in Stage 2. Lower is better.	N	PDV050023803.1_00100
PDE050023804.1	IED Errors (Stage 3) - Compound Discrimination Non-superimposed	This is the total number of errors made in Stage 3; when two perceptual dimensions are present (shape and line). Lower is better.	N	PDV050023804.1_00100
PDE050023805.1	IED Errors (Stage 4) - Compound Discrimination Superimposed	This is the total number of errors made in Stage 4; when two perceptual dimensions are present superimposed to provide a compound stimulus. Lower is better.	N	PDV050023805.1_00100
PDE050023806.1	IED Errors (Stage 5) - Compound Reversal	This is the total number of errors made in Stage 5. Lower is better.	N	PDV050023806.1_00100
PDE050023807.1	IED Errors (Stage 6) - Intradimensional Shift	This is the total number of errors made in Stage 6: the number of errors taken to successfully complete an intra-dimensional shift (the shift of attention to a novel exemplar within a previously relevant perceptual dimension). Lower is better.	N	PDV050023807.1_00100
PDE050023808.1	IED Errors (Stage 7) - Intradimensional Reversal	This is the total number of errors made in Stage 7. Lower is better.	N	PDV050023808.1_00100
PDE050023809.1	IED Errors (Stage 8) - Extradimensional Shift if specified	This is the total number of errors made in Stage 8: the number of errors taken to successfully complete an extra-dimensional shift (the shift of attention to a novel exemplar of a previously unrewarded perceptual dimension).	N	PDV050023809.1_00100
PDE050023810.1	IED Errors (Stage 9) - Extradimensional Reversal if specified	This is the total number of errors made in Stage 9. Lower is better.	N	PDV050023810.1_00100
PDE050023811.1	IED Pre-ED Errors	The number of times the subject chose the incorrect box for a stimulus on problems prior to the extra-dimensional shift. Lower is better. This measure records the number of errors made prior to the extra-dimensional shift of the task. Errors are defined as instances when the subject fails to select the stimulus that is compatible with the current rule.	N	PDV050023811.1_00100
PDE050023812.1	IED Stages Completed	This is the total number of stages the subject completed successfully. There are nine stages to be completed. Higher is better.	N	PDV050023812.1_00100
PDE050023813.1	IED Total Errors	The total number of times that the subject chose a wrong stimulus (i.e. one incompatible with the current rule). Lower is better. This is a measure of the subject's efficiency in attempting the test.	N	PDV050023813.1_00100
PDE050023814.1	IED Total Latency	Calculated by obtaining the sum of the subject's response times (in milliseconds) over all trials excluding the first two trials of Stage 1. The response time for a single trial is measured from the appearance of the stimuli; up to the time where the subject made their final choice for that trial.	N	PDV050023814.1_00100

ID	Term	Description	Type	Variable IDs
PDE050023815.1	IED Total Latency Stage 1	Calculated by obtaining the sum of the subject's response times (in milliseconds) over all the 'assessed' trials during Stage 1. Note that: the first two trials of Stage 1 are not included since they are accompanied by voice instructions; and so are regarded as practice for the purposes of this measure calculation. The response time for a single trial is measured from the appearance of the stimuli; up to the time where the subject made their final choice for that trial.	N	PDV050023815.1_00100
PDE050023816.1	IED Total Latency Stage 2	Calculated by obtaining the sum of the subject's response times (in milliseconds) over all trials during Stage 2. The response time for a single trial is measured from the appearance of the stimuli; up to the time where the subject made their final choice for that trial.	N	PDV050023816.1_00100
PDE050023817.1	IED Total Latency Stage 3	Calculated by obtaining the sum of the subject's response times (in milliseconds) over all trials during Stage 3. The response time for a single trial is measured from the appearance of the stimuli; up to the time where the subject made their final choice for that trial.	N	PDV050023817.1_00100
PDE050023818.1	IED Total Latency Stage 4	Calculated by obtaining the sum of the subject's response times (in milliseconds) over all trials during Stage 4. The response time for a single trial is measured from the appearance of the stimuli; up to the time where the subject made their final choice for that trial.	N	PDV050023818.1_00100
PDE050023819.1	IED Total Latency Stage 5	Calculated by obtaining the sum of the subject's response times (in milliseconds) over all trials during Stage 5. The response time for a single trial is measured from the appearance of the stimuli; up to the time where the subject made their final choice for that trial.	N	PDV050023819.1_00100
PDE050023820.1	IED Total Latency Stage 6	Calculated by obtaining the sum of the subject's response times (in milliseconds) over all trials during Stage 6. The response time for a single trial is measured from the appearance of the stimuli; up to the time where the subject made their final choice for that trial.	N	PDV050023820.1_00100

ID	Term	Description	Type	Variable IDs
PDE050023821.1	IED Total Latency Stage 7	Calculated by obtaining the sum of the subject's response times (in milliseconds) over all trials during Stage 7. The response time for a single trial is measured from the appearance of the stimuli; up to the time where the subject made their final choice for that trial.	N	PDV050023821.1_00100
PDE050023822.1	IED Total Latency Stage 8	Calculated by obtaining the sum of the subject's response times (in milliseconds) over all trials during Stage 8. The response time for a single trial is measured from the appearance of the stimuli; up to the time where the subject made their final choice for that trial.	N	PDV050023822.1_00100
PDE050023823.1	IED Total Latency Stage 9	Calculated by obtaining the sum of the subject's response times (in milliseconds) over all trials during Stage 9. The response time for a single trial is measured from the appearance of the stimuli; up to the time where the subject made their final choice for that trial.	N	PDV050023823.1_00100
PDE050023824.1	IED Total Trials	This is the number of trials completed on all attempted stages. Lower is better.	N	PDV050023824.1_00100
PDE050023825.1	IED Total Trials (Adjusted)	This is the number of trials completed on all attempted stages with an adjustment for any stages not reached.Lower is better. Total Trials Adjusted = Total Trials (problems reached) + [(number of unreached problems) * (50)] subjects failing at any stage of the test will have had less opportunity to make choices (correct and erroneous). The adjustment is carried out to compensate for this missing data and provide a more comparable error score to subjects completing all stages of the test.	N	PDV050023825.1_00100
PDE050023826.1	IED Total Trials Stage 1	This is the number of trials completed on Stage 1. Lower is better.	N	PDV050023826.1_00100
PDE050023827.1	IED Total Trials Stage 2	This is the number of trials completed on Stage 2. Lower is better.	N	PDV050023827.1_00100
PDE050023828.1	IED Total Trials Stage 3	This is the number of trials completed on Stage 3. Lower is better.	N	PDV050023828.1_00100
PDE050023829.1	IED Total Trials Stage 4	This is the number of trials completed on Stage 4. Lower is better.	N	PDV050023829.1_00100
PDE050023830.1	IED Total Trials Stage 5	This is the number of trials completed on Stage 5. Lower is better.	N	PDV050023830.1_00100
PDE050023831.1	IED Total Trials Stage 6	This is the number of trials completed on Stage 6. Lower is better.	N	PDV050023831.1_00100
PDE050023832.1	IED Total Trials Stage 7	This is the number of trials completed on Stage 7. Lower is better.	N	PDV050023832.1_00100
PDE050023833.1	IED Total Trials Stage 8	This is the number of trials completed on Stage 8. Lower is better.	N	PDV050023833.1_00100
PDE050023834.1	IED Total Trials Stage 9	This is the number of trials completed on Stage 9. Lower is better.	N	PDV050023834.1_00100
PDE050023835.1	KEY: IED EDS Errors	The number of trials for which the outcome was an incorrect response (subject pressed the incorrect button within the response window), calculated across all	N	PDV050023835.1_00100

ID	Term	Description	Type	Variable IDs
PDE050023836.1	KEY: IED Total Errors (Adjusted)	The total number of times that the subject chose a wrong stimulus – i.e. one incompatible with the current rule, adjustment for every stage that was not reached. Total Errors Adjusted = Total Errors (problems reached) + [(number of unreached problems) * (25)] This is a measure of the subject's efficiency in attempting the test. subjects failing at any stage of the test will have had less opportunity to make errors.	N	PDV050023836.1_00100
PDE050023837.1	KEY: PAL First Attempt Memory Score	The number of times a subject chose the correct box on their first attempt when recalling the pattern locations. Calculated across assessed trials, omitting 12 box level to provide a direct comparison to Recommended Standard.	N	PDV050023837.1_00100
PDE050023838.1	KEY: PAL Total Errors (Adjusted)	The number of times the subject chose the incorrect box for a stimulus on assessment problems (PALTE), plus an adjustment for the estimated number of errors they would have made on any problems, attempts and recalls they did not reach. This measure allows you to compare performance on errors made across all subjects regardless of those who terminated early versus those completing the final stage of the task.	N	PDV050023838.1_00100
PDE050023839.1	KEY: RVP A'	A' is the signal detection measure of a subject's sensitivity to the target sequence (string of three numbers); regardless of response tendency (the expected range is 0.00 to 1.00; bad to good). In essence; this metric is a measure of how good the subject is at detecting target sequences.	N	PDV050023839.1_00100
PDE050023840.1	KEY: RVP Median Response Latency	The median response latency on trials where the subject responded correctly. Calculated across all assessed trials.	N	PDV050023840.1_00100
PDE050023841.1	KEY: RVP Probability of False Alarm	The number of sequence presentations that were false alarms divided by the number of sequence presentations that were false alarms plus the number of sequence presentations that were correct rejections (False Alarms ÷ (False Alarms + Correct	N	PDV050023841.1_00100
PDE050023842.1	KEY: SOC Initial Thinking Time Median (5 Moves)	Subjects are encouraged to plan their moves before actually starting to solve the problems. Initial thinking time is the difference in the time taken to select the first ball for the same problem in the solve compared to follow conditions. This measure therefore provides an indication of the time taken to plan the problem solution for assessed problems with 5 moves, discounting movement time. This score may be 0 if the subject is slower in the follow condition.	N	PDV050023842.1_00100
PDE050023843.1	KEY: SOC Mean Moves (5 Moves)	The mean number of moves that the subject required to complete problems. This measure is calculated over 5 Moves assessed problems only.	N	PDV050023843.1_00100
PDE050023844.1	KEY: SOC Problems Solved in Minimum Moves Total (all moves)	The number of assessed problems that the subject successfully completed in the minimum possible number of moves. Calculated over all assessed trials.	N	PDV050023844.1_00100

ID	Term	Description	Type	Variable IDs
PDE050023845.1	KEY: SOC Subsequent Thinking Time Median (5 Moves)	Calculated as the time between selecting the first ball and completing the problem in the solve conditions minus the corresponding time in the follow condition. This time difference is then divided by the number of moves made in the solve phase. This measure provides an indication of any time taken by the subject to plan or re-plan the problem solution after they have made their first move taking into account their movement time, and the number of moves made. Calculated across all 5 move problems.	N	PDV050023845.1_00100
PDE050023846.1	KEY: SWM Between Errors	The number of times the subject incorrectly revisits a box in which a token has previously been found. Calculated across all assessed four, six and eight token trials.	N	PDV050023846.1_00100
PDE050023847.1	KEY: SWM Between errors 4 boxes	The number of times a subject revisits a box in which a token has previously been found. Calculated across all trials with 4 tokens only.	N	PDV050023847.1_00100
PDE050023848.1	KEY: SWM Between errors 6 boxes	The number of times the subject revisits a box in which a token has previously been found. Calculated across all trials with 6 tokens only.	N	PDV050023848.1_00100
PDE050023849.1	KEY: SWM Between errors 8 boxes	The number of times the subject revisits a box in which a token has previously been found. Calculated across all trials with 8 tokens only.	N	PDV050023849.1_00100
PDE050023850.1	KEY: SWM Strategy (6-8 boxes)	The number of times a subject begins a new search pattern from the same box they started with previously. If they always begin a search from the same starting point, we infer that the subject is employing a planned strategy for finding the tokens. Therefore, a low score indicates high strategy use (1 = they always begin the search from the same box), a high score indicates that they are beginning their searches from many different boxes. Calculated across assessed trials with 6 tokens or more.	N	PDV050023850.1_00100
PDE050023851.1	PAL Mean Errors to Success	The mean number of attempts made by a subject needed for them to successfully complete the stage. Does not include 12 box level to provide a direct comparison to Recommended Standard.	N	PDV050023851.1_00100
PDE050023852.1	PAL Number of Patterns Reached	The number of patterns presented to the subject on the last problem they reached.	N	PDV050023852.1_00100
PDE050023853.1	PAL Total Attempts	The total number of attempts made (but not necessarily completed) by the subject during assessment problems. Does not include 12 box level to provide a direct comparison to Recommended Standard.	N	PDV050023853.1_00100
PDE050023854.1	PAL Total Attempts 12 Patterns	The total number of attempts made (but not necessarily completed) by the subject during assessment problems containing a total of 12 shapes to recall.	N	PDV050023854.1_00100
PDE050023855.1	PAL Total Attempts 2 Patterns	The total number of attempts made (but not necessarily completed) by the subject during assessment problems containing a total of 2 shapes to recall.	N	PDV050023855.1_00100
PDE050023856.1	PAL Total Attempts 4 patterns	The total number of attempts made (but not necessarily completed) by the subject during assessment problems containing a total of 4 shapes to recall.	N	PDV050023856.1_00100
PDE050023857.1	PAL Total Attempts 6 Patterns	The total number of attempts made (but not necessarily completed) by the subject during assessment problems containing a total of 6 shapes to recall.	N	PDV050023857.1_00100

ID	Term	Description	Type	Variable IDs
PDE050023858.1	PAL Total Attempts 8 Patterns	The total number of attempts made (but not necessarily completed) by the subject during assessment problems containing a total of 8 shapes to recall.	N	PDV050023858.1_00100
PDE050023859.1	PAL Total Errors	The total number of times a subject selected an incorrect box when attempting to recall a pattern location. Calculated across all assessed trials. Does not include 12 box level to provide a direct comparison to Recommended Standard.	N	PDV050023859.1_00100
PDE050023860.1	PAL Total Errors 12 Patterns	The total number of times a subject selected an incorrect box when attempting to recall a pattern location on trials containing a total of 12 patterns. Calculated across all 12-pattern assessed trials.	N	PDV050023860.1_00100
PDE050023861.1	PAL Total Errors 12 Shapes (Adjusted)	The number of times the subject chose the incorrect box for a stimulus on assessment problems; where the number of shapes was equal to 12 (PALTE12); plus an adjustment for the estimated number of errors they would have made on any other 12 pattern problems; attempts and recalls they did not reach.	N	PDV050023861.1_00100
PDE050023862.1	PAL Total Errors 2 Patterns	The total number of times a subject selected an incorrect box when attempting to recall a pattern location on trials containing a total of 2 patterns. Calculated across all 2-pattern assessed trials.	N	PDV050023862.1_00100
PDE050023863.1	PAL Total Errors 2 Shapes (Adjusted)	The number of times the subject chose the incorrect box for a stimulus on assessment problems; where the number of shapes required to remember was equal to 2 (PALTE2); plus an adjustment for the estimated number of errors they would have made on any other 2 pattern problems; attempts and recalls they did not reach.	N	PDV050023863.1_00100
PDE050023864.1	PAL Total Errors 4 Patterns	The total number of times a subject selected an incorrect box when attempting to recall a pattern location on trials containing a total of 4 patterns. Calculated across all 4-pattern assessed trials.	N	PDV050023864.1_00100
PDE050023865.1	PAL Total Errors 4 Shapes (Adjusted)	The number of times the subject chose the incorrect box for a stimulus on assessment problems; where the number of shapes was equal to 4 (PALTE4); plus an adjustment for the estimated number of errors they would have made on any other 4 pattern problems; attempts and recalls they did not reach.	N	PDV050023865.1_00100

Pulmonary function

Pulmonary function

ID	Term	Description	Type	Variable IDs
PDE052023926.1	Expiratory reserve volume	The maximum volume of air that can be forcefully exhaled at the end of a quiet expiration. This is also known as expiratory reserve volume.	N	PDV052023926.1_00100
PDE052023927.1	Forced expiratory flow at 25% of FVC	Peak Expiratory Flow Rate (PEFR) at 25% of Forced Vital Capacity (FVC). It is a comprehensive indicator reflecting expiratory force and lung function status.	N	PDV052023927.1_00100
PDE052023928.1	Forced expiratory flow at 50% of FVC	Peak Expiratory Flow Rate (PEFR) at 50% of Forced Vital Capacity (FVC). It is a commonly used indicator reflecting small airway function.	N	PDV052023928.1_00100
PDE052023929.1	Forced expiratory flow at 75% of FVC	Peak Expiratory Flow Rate (PEFR) at 75% of Forced Vital Capacity (FVC). It is a commonly used indicator reflecting small airway function.	N	PDV052023929.1_00100

ID	Term	Description	Type	Variable IDs
PDE052023930.1	Forced expiratory time	The time taken to fully expirate air from the lungs.	N	PDV052023930.1_00100
PDE052023931.1	Forced expiratory volume in 1 second	It refers to the volume of gas forcefully exhaled in the first second during a forced expiration from total lung capacity. It is the most commonly used parameter for assessing the type and severity of ventilatory dysfunction.	N	PDV052023931.1_00100
PDE052023932.1	Forced expiratory volume in 1 second/ forced vital capacity	The ratio of the forced expiratory volume in the first second to the forced vital capacity. This is the most commonly used parameter for assessing ventilatory function status and the presence of airflow obstruction	N	PDV052023932.1_00100
PDE052023933.1	Forced vital capacity	Taking a deep breath to total lung capacity and then exhaling with maximum effort and speed to release the maximum volume of gas. In obstructive ventilation disorders, it is often less than the lung capacity.	N	PDV052023933.1_00100
PDE052023934.1	Inspiratory capacity	The maximum gas volume that can be inhaled with maximal effort after a calm expiration. It typically accounts for two-thirds of the vital capacity and constitutes the main part of the maximal breathing capacity. Inspiratory capacity is calculated as the sum of the tidal volume and the inspiratory reserve volume.	N	PDV052023934.1_00100
PDE052023935.1	Maximal expiratory flow-volume curve	It is the Flow-Volume Curve obtained during forced expiration with maximal effort and velocity starting from total lung capacity. It is one of the most commonly used graphs to assess airflow limitation.	N	PDV052023935.1_00100
PDE052023936.1	Maximal mid-expiratory flow	The average flow rate during forced expiration between 25% and 75% of the vital capacity after a deep inhalation.	N	PDV052023936.1_00100
PDE052023937.1	Maximal voluntary ventilation	The maximual voluntary ventilation (MVV) is the maximum volume of air that can be breathed out within a certain period of time.	N	PDV052023937.1_00100
PDE052023938.1	Peak expiratory flow	It refers to the maximum flow generated by the strongest and fastest exhalation from the position of total lung capacity. It is a parameter that comprehensively reflects ventilatory capacity, mainly used to reflect the dynamic follow-up of respiratory muscle strength and bronchial asthma.	N	PDV052023938.1_00100
PDE052023939.1	Respiratory rate	The number of breaths per minute. In healthy adults, the respiratory rate at rest is approximately 16 to 20 breaths per minute, with a ratio of about 1:4 between respiration and pulse rate.	N	PDV052023939.1_00100
PDE052023940.1	Tidal Volume	The volume of gas inhaled or exhaled per breath during quiet respiration, typically referring to tidal volume exhaled.	N	PDV052023940.1_00100
PDE052023941.1	Vital capacity	The maximum volume of air that can be exhaled after a maximal inhalation with a slow, controlled expiration. It is also referred to as slow vital capacity.	N	PDV052023941.1_00100
